PARTS & SUPPLIES FOR SALE

1929 to 1938 Modern Sealed Bearing Fan Hub

For 1929, 1930 & 1931 eights, 1932 to 1938 eights, and all 1932 to 1938 twelve's fan hub with sealed bearing assemblies. I have made two runs of sealed bearing fan hubs to replace the original oil bath fans that leak and throw oil. No more fan maintenance or fan failure that can damage your engine or radiator. These include a new shaft with modern sealed bearings and will look completely original and be maintenance free. Direct fit, will install in one hour. This has been my most popular replacement part in the past 20 years. All years 8 & 12 in stock and ready to ship. Please state year and series to be sure to get the correct part for your application. Price is \$300.00 each plus \$18.00 shipping anywhere in the US. Order now before we run out, we will do a third run but you may have to wait till mid summer before they are done.

1929-1932 Oil Filters for Eights

'29 - '32 eight oil filters. These filters are in process and I hope to have them available in the next 30 days. These will be exact copies of the original made of billet aluminum with a small modern spin-on filter inside. Because these are exact copies, they are expensive to manufacture and process. These will be perfect and exactly what your Pierce Arrow deserves (high quality). Because of the cost, only a small production run is planned. I will not make any for inventory. I probably will not make them again. If you would like to reserve one, please call me at the shop. No emails, please! If there is enough interest, the price will be lower. I expect them to run between \$550-\$625 dollars each plus shipping. Thank you for helping out another new Pierce Arrow car project.

1933-1938 Purolator Style Billet Oil Filters

Production run #2 - We have been sold out since Hershey. Used on 8 & 12 cyl. cars. 1933-1938 Purolator L6 & L8 exact reproduction oil filter made from billet aluminum. As used on Pierce Arrow cars and other large CCCA Classics. These have a heavy duty housing with an O-ring seal and a modern spin on oil filter inside. They will not crush or leak like the original converted oil filters do. They look exactly like the originals do, exact size, shape, and all dimensions. I also have correct reproduction oil filter brackets, as well as oil lines and fittings available. The billet filter in L6 & L8 will be available for inspection at the PAS meet in St Louis, price is \$550.00 for the filter plus shipping.

Gemmer Steering Box Bearing Kit

I am offering Gemmer steering box replacement bearings for both sides of the single tooth 1929-30 steering boxes. These left the factory with white metal races and have failed many times. This is the third run of this set. Due to increase part prices, the new price will be \$125.00 per set. Shipping \$3.50. This includes two replacement bearings with bushings and hardened washers, enough to repair one box. Questions, e-mail me. Thanks, Karl.

Dual Spare Kit

I have available two (2) sets remaining of my Series 80 dual spare tire conversion project. It is installed on eight Series 80 cars. The set will likely work for other Models / Series, but of that, I am unsure. If you are interested contact me for details / dimensions.

The price for the complete seven (7) piece set is \$550 USD, including S&H within the continental USA. Each set includes five (5)

cast silicon bronze pieces, two (2) steel stabilizer rods and all necessary stainless steel fasteners (nuts, bolts and flat & lock washers). Delivery is three to five days after receipt of order, with shipping via USPS Priority Mail. Any questions? Contact me at the email address shown or give me a call between 8:00 AM and 9:00 PM, Eastern time. NOTE: For anyone interested, you do not have to hunt for an additional split rim. Coker Tire will make a split rim for you. I had them do it and sent them a dimensional drawing of the rim, including the placement of the tube stem hole and where the split should be relative to the tube stem hole. They offered a closure snap, but I had them skip that for me and had a local blacksmith create a Series 80 style closure (easy to do). The rim is identical to the original and has run on the car without a problem for the past 5 years.

Gemmer Steering Box Rebuilds

1929 & 1930 Pierce-Arrow Gemmer steering box rebuild service. I make new axles and roller wheels, install new bearings, and install modern oil seals. I hard face the sector shaft and replace the high wear bushings with bearings for a much smoother and effortless steering box. I have developed a proper replacement bearing for the worm gear. In most cases I can save a moderately worn box where there is excessive play in the wheel at twelve o'clock position. I have rebuilt many of these boxes both left hand and right hand drive for customers all over the world. No less than 50 of these boxes have now been done in my shop over the last twelve years. We fix what the others can't. Your car will steer better than it did when it left the factory. Thanks, John. Please note: call with questions, as I only check my emails once a week. Thank You.

New CNC Machined Valves & Valve Guides

I am currently making a fifth run of Pierce eight and twelve valves and valve guides. Valves are CNC machined from a modern diesel valve blank. They will be the last set ever installed in your engine. Fit and finish is much better than new. Please call with your needs, price will vary with quantity of sets produced. These valves are of much better quality than the Chinese products available on the market. Manufactured in the USA, there is no comparison in quality of materials, hardness and detail in machining. Thank you for more than 25 years of support for my reproduction products. John.

1936 to 1938 Pierce Arrow Exhaust Systems

I have reproduced exact copies of the original exhaust system from factory original pipe and muffler patterns. All pipes are correct size and mandrel bent on a CNC bender. Mufflers are correct size double wrapped housings as the factory also installed. I am also reproducing all the correct hangers and original style clamps. I am also making the hangers bolt through for rubber mounting the system. I have made 12 sets and only have one left. I also have a few extra clamps and hangers available in small quantities only. Anyone interested should contact me ASAP. This is a high quality original exhaust system and they won't be available again. Price is \$1,650.00 for all the pipes and four mufflers. Shipping not included.

Rebuilt 366 CID Pierce Eight Engine

1934 366 CID 8 cylinder engine block, casting number 702747. Block has reground crank, set up with new babbitt main bearings. Block casting date is 0.3.22, serial number 240409. Bearing job is perfect and crank spins with no drag. Crank is ground .010 under on rods, and .010 on mains. Oil clearance was set at .002 on the mains. This block is the same for both 366 and 385 CID engines for 1933 to 1938. Today's cost for main bearings and crank grinding on a Pierce eight is at least \$3,500. This block has also been sand blasted, cleaned, adding at least another \$350. in labour. So that's a minimum value of \$3,850., not including the value of the parts. All this work was done by a professional antique car restoration shop, not a local back yard job. I am offering this motor for \$3,000. and can deliver it to the PAS National or Museum Meet as well as Hershey. Why wait more than a year for another shop to try and do your bearings right when you can have this one right away? Call with any questions. Thanks, John.
